

STATEMENT

We undersigned, CHRISTEYNS SA, based 31 rue de la Maladrie, 44124 VERTOU, France, attests that the product PHAGOCIDE D can be used for manual and semi-automatic disinfection of endoscopes, surgical instruments and thermosensitive devices.

The PHAGOCIDE D working solution is stable for forty five (45) days.

Previously the product PHAGOCIDE D was with a claim of fourteen (14) days stability.

Our laboratory made a new study to reevaluate the stability and efficacy of the bath of the product PHAGOCIDE D. Based on it, we can now claim 45 days of stability of the solution of PHAGOCIDE D.

Moreover we recommend a 45 days maximum use duration, with validation of the disinfectant solution by regular checking of the glutaraldehyde with test strips
