**e. Virucidal activity**

○ **Validation Protocols**

**Control of sensitivity of cells to virus**

- Add one volume of solution S or PBS + one volume of cellular suspension at  $2.10^5$  cellules/ml for one hour in water bath at  $36^\circ\text{C} \pm 1^\circ\text{C}$
- The cells are centrifuged and resuspended in culture media
- The virus is diluted from 1/4 to 1/4 on a 96-well microplate (15 dilutions)
- Add 100  $\mu\text{l}$  of cell suspension treated (Solution S) or not treated (PBS control) to each well of the microplate
- Incubate for 48 hours at 72 hours

The difference of titre reduction between cells treated by the solution S and cells treated by PBS shall be  $< 1 \lg$ .

**Control of efficiency for suppression of disinfectant activity**

- Add 1 volume of BSA + 1 volume of virus suspension + 1 volume of solution S or distilled water
- Leave the mixture in the ice bath for 30 min at room temperature

**Titration method**

- Titrate the virus (method titration on cell in suspension) by following steps :
- Serial dilutions (1/4) are realized with culture medium in the glass tube
- Transfer 0,1 ml of each dilution into eight wells of a microplate plaque
- The last row of eight wells will receive 0,1 ml of culture medium (control untreated cells)
- Add 0,1 ml of cell suspension cells at  $2.10^5$  cell/ml.
- Incubate for 48 or 72 hours at  $36^\circ\text{C} \pm 1^\circ\text{C}$  under 5%  $\text{CO}_2 \pm 2\%$ .
- The viral cytopathic effect is read by using an inverted microscope

The estimated of infectious unite is determined by method KARBEN-SPAERMAN calculating the negative logarithm of 50% endpoint ( $\lg\text{DICT}_{50}$ ) by the following formula :

$\lg\text{DICT}_{50}$  = negative logarithm of the highest concentration of virus -  $[(\text{Sum of \% affected to each dilution}/100 - 0.5) \times (\lg \text{dilution})]$

○ **Results**

**Adenovirus type 5**

Virus suspension titre: IgDICT50 = 8,7

No cytotoxicity was observed on the carrier without treatment which has been pretreated with the aerial disinfection system according to treatment 1 and 2.
