

UWAGI:

- [illegible]

ATTENTION:

1. Baler or *ex* – parentheses symbols can be used by constructor only after written approval of client.
  2. All proposed solutions (of this project) and other relative projects) to be clearly according to technical data of the installation and State standards.
  3. Drawing to be made in accordance with assembly drawings, forms and pattern drawings
  4. Consider including the new architecture and industry projects
  5. Elements have to be well used by proven ways
  6. Elements have to use a minimum that well (if it is possible)
- For a secondary drawing, the thickness of a sheet is 0,7mm.
6. Drawing and showing dimensions of the holes, localisations of the metal sheet and profiles.
- This drawing is not assembly drawing.
- Localisation of the holes is shown on the drawings of metal sheets and profiles position.
- Localisation of the non dimensional consider as oval
- example: Bars, slots and a part of the trusses
